CAUTION

DESCRIPTION
MICROTHIOL SPECIAL DISPERSS is a dust free, flowable sulphur fungicide/miticide formulation for the control of powdery mildew and mites in french beans, cucumber, tomatoes and powdery mildew in roses. It acts by contact and through vapour action. The contact action relies upon good leaf coverage and the close proximity with the fungus. It has a long residual activity.

DIRECTIONS FOR USE

Crop	Dosage	
	Kg/ha	Gm/20 Lt water
French beans	2-4	40-80
Cucumber	2-4	40-80
Tomato	2-4	40-80
Roses	2-4	40-80

Note:
Best results are obtained when **MICROTHIOL SPECIAL DISPERSS** is applied before disease or mite populations are well established. Avoid spraying sulphur during flowering as most crops are sensitive. A spray interval of 7-10 days is recommended, depending on the disease / mite pressure.

PRE-HARVEST INTERVAL: - 0 days in open fields and 3 days in greenhouses.

PHYTOTOXICITY
MICROTHIOL SPECIAL DISPERSS is not phytotoxic when used as recommended.

METHOD OF APPLICATION
MICROTHIOL SPECIAL DISPERS can be applied by leaf surface spraying. Thorough wetting of the crop must be ensured. Fill the spray tank with clean water, add the necessary quantity of MICROTHIOL SPECIAL DISPERSS and stir, then top up with water. Keep on agitating when filling and during spray operations.

HANDLING PRECAUTIONS
- Do not smoke drink or eat while using this product.
- Avoid eye contact. Wear safety goggles when handling the product.
- Avoid spray mist and exposure to the product. Wear rubber gloves, mask covering nose and mouth. Wear protective clothing such as long sleeved shirts, long pants and rubber boots when handling the product.
- After application wash yourself and your work clothes.

STORAGE
Store in original, tightly closed container away from children, food, drinks and livestock feedstuffs. Store in a cool, dry and well ventilated area under lock and key. Avoid exposure to direct sunlight. Kept under these conditions, the shelf life of MICROTHIOL SPECIAL DISPERSS is 2 years.

DISPOSAL
Surplus product, if unused should be disposed off on a landfill site approved for pesticides or bury in a safe place away from water sources in accordance with national requirement and regulations. Do not use empty container for any other purpose. After use, Empty packing must be punctured and destroyed or incinerated.

Spillage
Remove contaminated soil layer and bury in a safe place away from water sources.

Collect the contaminated material thoroughly and bury in a safe place or put it in a waste bin or a plastic bag, mark it and dispose off on a landfill site approved for pesticides. Contaminated sawdust to be burnt away from human dwellings.Clean spilled area with plenty of water. Spilt product must not be re-used.

ENVIRONMENT AND WILDLIFE
This product is moderately toxic to fish. Do not contaminate water sources and supplies by disposal of product waste.
Keep livestock out of treated areas.

FIRST AID INSTRUCTIONS
In case of eye contact: Flush the eyes with running water for at least 15 minutes while holding eyelids open to help flush out material. Contact a physician immediately.
In case of skin contact: Wash contaminated skin with soap and plenty of water. Remove contaminated clothing. If skin irritation persists, contact a physician immediately.
In case of inhalation: Remove the patient away from contaminated area and place the patient in a well-ventilated area and give artificial respiration. Keep warm and at rest. Consult a doctor.
In case of ingestion: If small a amount is swallowed, drink plenty of water and induce vomiting. Repeat until fluid is clear. If a large amount is ingested (i.e. one mouthful), induction of vomiting should be considered if patient is fully conscious and less than 30 minutes has elapsed since ingestion. Never give anything by mouth to an unconscious person. Contact a physician immediately.
