

Dalot 240EC is a post emergence herbicide for control of grasses in onions and beans.

ACTIVE INGREDIENT: Clethodim 240g/L
FORMULATION: Emulsifiable Concentrate (EC)
REGISTRATION NO: PCPB(CR) 2014- p(ii)
WHO CLASSIFICATION: WHO Class III

MODE OF ACTION Dalot 240EC is a post emergence herbicide for control of grasses in onions. It is a Systemic herbicide, rapidly absorbed and readily translocated from treated foliage to the root system and other growing parts of the plant. It kills the weeds by inhibiting shoot and root growth.

RATE OF APPLICATION:

Crops	Rate of application		Susceptible Weeds	Remarks
	Rate/20L	Rate/Ha	Grasses	
Beans and onions	50ml	1Lt	<ul style="list-style-type: none"> Goose grass (<i>Eleusine indica</i>) Common wild oats (<i>Avena fatua</i>) Barnyard grass (<i>Echinochloa crusgalli</i>) Star grass (<i>Cynodon spp</i>) Italian grass (<i>Lolium multiflorum</i>) Nutsedge (<i>Cyperus spp</i>) Winter grass (<i>Poa annua</i>) Guinea grass (<i>Panicum spp</i>) 	<ul style="list-style-type: none"> Apply when annual grasses are at 2-6 leaf stage. Do not apply to plants undergoing stress or plants that have exceeded the recommended growth stage. Cultivation 7 days prior and after chemical application, or heavy rainfall occurring 1hour after application may reduce effectiveness. Do not apply a post emergence broadleaf herbicide 1 day after application of Dalot 240EC® 1 application of Dalot 240EC® per season is recommended.

Re-entry interval (REI): 6 hours

Pre- harvest Interval (PHI): 56 days on Onions

MIXING INSTRUCTIONS

Half-fill the spray tank with water. Add the required amount of **Dalot 240EC®**, then fill the water to the required level and mix or agitate thoroughly to uniformity. Spray immediately after mixing.

- Apply when annual grasses are at 2-6 leaf stage.
- Do not apply to plants undergoing stress or plants that have exceeded the recommended growth stage.

WHY USE DALOT 240EC HERBICIDE FOR ONION/BEANS WEEDING?

- **Dalot 240EC®** has outstanding and long-lasting control of grass weeds in onions
- **Dalot 240EC®** has excellent crop safety, kills target weeds, and does not affect onions and beans
- **Dalot 240EC®** is cost effective due to low use rates; Only 50ml in 20 liters of water and 1 liter per Hectare.
- **Dalot 240EC®** offers flexibility in post-emergence application timing, at 2-6 weed leaf stage.
