

Herbicide

STINGER

Active Ingredient: Fluroxypyr-meptyl 200g/L

200EC

Post-emergence herbicide for control of annual broadleaf weeds in wheat, barley and maize.

BENEFITS

- Very effective of wide range of annual broad-leafed weeds such as wondering jew, black jack, black night shade, double thorn etc.
- **Stinger** is selective to the wheat, Barley and Maize crop, meaning it will only harm target weeds but does not affect wheat, Barley and maize.
- Quick reaction on weeds, stops cell division hence killing the weeds faster.
- **Stinger** can be used to control even woody brush weed such as Mexican marigold

MODE OF ACTION

STINGER 200EC contains Fluroxypyr as an active ingredient. It is taken up by foliar and translocated rapidly to other parts of the plant. Its symptoms on weeds are evident through leaf curling, twisting and cupping. On young undeveloped leaves, they become stunted and distorted resulting to chlorosis and death of the weeds.

Direction for use

Crops	Susceptible weeds	Rate of application		Timing and frequency of application
		Rate/20L	Rate/Ha	
Wheat, Barley, Maize	Broadleaf weeds	100ml in 20L of water	1.0L in 200L of water	<ul style="list-style-type: none"> Apply at already emerged weeds and when the crop is from 3-leaf stage up to booting (flag leaf) growth stage. Weeds should only be sprayed in the young stages and when actively growing in moist soil. Users are advised to always check for crop compatibility / tolerance by treating a few plants before large-scale application. Do not apply STINGER 200 EC if rain is expected within 2 hours. Make 1 application post emergence.

When to apply Stinger 200EC

Mixing instructions

Half-fill the spray tank with water. Add the required amount of Stinger 200EC, then fill with water to the required level and continue with stirring or agitation until the mixture is thoroughly uniform.

MAELEZO

Jinsi inavyofanya kazi

STINGER 200EC ni kiuu gugu cha kudhibiti magugu yenye majani mapana kwa ngano, shayiri na mahindi.

STINGER 200EC iko na kiungo cha Fluroxypyr kutoka kikundi cha kemikali cha 'Pyridine carboxylic acid'. Fluroxypyr inafyonzwa na majani na husambaa katika sehemu zingine za mimea. Dalili zake kwenye magugu huonekana kwa njia ya kujikunja kwa majani. Kwenye majani machanga ambayo hayajastawi, hudumaa na kupotoshwa na kusababisha kifo cha magugu.

Maelekezo ya utumizi

Mimea	Magugu	Kiwango cha matumizi		Wakati na mzunguko wa matumizi
		Kiwango kwa lita 20	Kiwango kwa Hekta	
Ngano Shayiri Mahindi	Majani mapana	Mililita 100 kwa Lita 20 ya maji	Lita 1.0 kwa lita 200 ya maji	<ul style="list-style-type: none"> Nyunyizia kwa magugu yaliyoibuka tayari na mimea ifikapo katika hatua la jani. Nyunyizia dawa kwekwe zikiwa bado changa na wakati zinakua kwa haraka kwenye udongo wenye unyevu. Fanyia jaribio na mimea kidogo kabla ya kunyunyizia dawa kwa kiwango kikubwa. Usinyunyizie dawa ikiwa mvua inatarajiwa kunyesha kati ya masaa mawili. Nyunyizia dawa mara 1 baada ya magugu kuchipuka.

Usipande mimea yenye majani mapana kati ya siku 120 baada ya kunyunyizia dawa.

Muda salama wa kusubiri kabla ya kuingia mahali Stinger 200EC imepigwa: Masaa 12

Muda wa kusubiri kabla ya kuvuna: Siku 61 kwa Mahindi, Shayiri na Ngano.

Maelezo ya matumizi

Tia maji kwenye bomba hadi katikati. Ongeza kiasi cha Stinger 200EC kama ilivyopendekezwa kisha uongeze kiasi cha maji kilichosalia huku ukichanganya kwa kutikisa hadi usawa. Nyunyizia punde tu unapotayarisha dawa.

Manufaa

- Inautenda kazi wa hali ya juu kwa magugu ya majani mapana kama vile 'wondering jew', 'black night shade', 'double thorn' na 'black jack'.
- Stinger ni salama kwa Ngano, Mahindi na Shayiri, kumaanisha kwamba itadhuru tu magugu, lakini haina athari kwa Ngano, Mahindi na Shayiri
- Stinger inautenda kazi wa haraka muno kwenye magugu, huzuia mgawanyiko wa seli na hivyo kuua magugu.
- Stinger inaweza kutumika kudhibiti hata magugu ya brashi kama vile 'Mexican Marigold'.
